Transition Automation will Introduce an Innovative Cleaning System at Apex

Closed loop cleaning system enables SMT printer users to quickly and efficiently clean squeegees, supplies, accessories, pc boards and other hardware which has become contaminated with solder paste.

Tyngsboro, Massachusetts —Transition Automation, Inc. the worldwide leader in the manufacturing and distribution of Permalex® Edge Metal Squeegees, holder systems, and advanced self-cleaning squeegee systems plans to showcase a new cleaning system to help SMT printer operators lower their time and expense cleaning solder paste. The new system eliminates the need to manually scrape and wipe solder paste from hardware such as squeegees and misprinted boards, and eliminates the need for saturated wipes.

The new system allows users a “mini-car-wash” type function with push-button activation and no external spraying or chemical exposure. The system is hermetically sealed to prevent vapors and discharge of unwanted materials in and around the SMT printer. The system re-circulates the cleaning fluid and traps washed solder paste in an easy to clean catch basin. The design is light weight, compact and highly portable allowing users to pick it up and move it to any line or area which needs attention. To see more of this patent pending innovation, visit Transition Automation’s booth # 2163 at the upcoming Apex show in Las Vegas, from March 31 until April 2.

Transition Automation, Inc. is a worldwide leader in the manufacturing and distribution of Permalex® Edge Metal Squeegees, holder systems, and advanced self-cleaning squeegee systems. Founded in 1989, Transition Automation, Inc. continues to advance the state of the art in surface mount solder paste printing by innovating the critical and high-cycle squeegee component of the SMT assembly process. The company recently relocated to 5 Trader Circle, Building D in Tyngsboro, Massachusetts 01879. For further information or to receive a quotation, please contact Transition at 978-649-2400, or Toll-Free (in the U.S.A.) 800-648-3338; or via Fax at: 978-649-2491.
